6.1 Risk Ownership

6.2 Risk Review Frequency

1 PURPOSE

The purpose of this document is to define and summarize the IT Risk Register of PayLink Solutions. It aims to provide a comprehensive understanding of identified risks within the PayLink cloud-based payment environment and tracks their evaluation, treatment and ownership.

2 SCOPE

This document applies to the following units of PayLink Solutions:

- Cloud Infrastructure
- SaaS Tools
- Business Operations
- Payment Systems
- Supporting IT Services

3 Related Documents

- PayLink ISMS Scope
- PayLink Asset Inventory
- PayLink Risk Register Spreadsheet

4 Risk Summary Table

Brief overview of the identified risks:

Risk Description	Risk Level	Risk Owner	Status
Regulatory non-compliance	High	Compliance Officer	Under Control
Cloud Service Outage	High	IT Operations Manager	Under Control
Staff Unavailability	Medium	HR Manager	Accepted
API failures	High	IT Operations Manager	Under Control
Unauthorized Access	High	CISO	Under Control
System/Hardware Failures	Medium	IT Operations Manager	Under Control
Cyber/Network Attacks	High	CISO	Monitoring
Tool Glitches	Medium	IT Operations Manager	Under Control
Natural Disasters	Medium	Administration Officer	Monitoring
Fire Hazard	Medium	Administration Officer	Under Control
Maintenance/Configuration failures	Medium	IT Operations Manager	Monitoring
Network Failures or Misconfigurations	High	IT Operations Manager	Under Control

5 Risk Register Reference

The detailed and structured risk register is stored and maintained in the Excel file: PayLink Risk Assessment & Evaluation.xlsx

6 Governance & Ownership Section

6.1 Risk Ownership

Each identified risks mentioned in the spreadsheet is assigned to a Risk Owner. The Risk Owner is responsible for monitoring, managing and mitigating the risks within their domain. The Risk Owners' list of responsibilities also involves ensuring the implementation of appropriate controls and that the risk remains within the acceptable risk tolerance of the organization.

Risk Owner Responsibilities:

- Monitoring risks relevant to their assigned systems or infrastructure.
- Reviewing and updating risk mitigation procedures.
- Reporting risk status and changes to senior management
- Ensuring compliance with security policies, regulatory requirements and industry standards
- Implementing and maintaining controls to reduce the likelihood or impact of risks
- Coordinating incident response when risk events occur.

6.2 Risk Review Frequency

The risk register must be reviewed on a regular basis to ensure that the identified risks remain accurately assessed and that mitigation strategies remain effective.

Risk Level	Review Frequency
High Risk	Monthly
Medium Risk	Every 6 months
Low Risk	Annually

Risk reviews include:

- Evaluating the existing controls to ensure their effectiveness
- Updating risk likelihood or impact if there is change in conditions
- Identifying and registering new risks
