- Information Security Policy

4 SCOPE OF THE ISMS

PayLink Digital Solutions, founded in 2015 in London, UK, is a global company providing full-service financial technology specializing in secure, AI-driven digital payment and open banking solutions. The company operates in Europe, Asia and the Americas and serves clients across various sectors, including banking and financial services, e-commerce, and cryptocurrency. PayLink Digital Solutions offers a portfolio of services such as payment integration and API development, RegTech and compliance support, automated KYC/AML onboarding and so on, and products such as PayLink Wallet, Open API Suite, PayLink Ledger and many more.

The scope of Information Security Management System (ISMS) for PayLink Digital Sol. encompasses the following domains:

- **Organizational Scope:** This includes all relevant legal entities, departments, divisions, and processes that are critical to the management and protection of information assets within the organization.
- **Physical Scope:** This covers all sites, facilities, and physical locations where information assets are stored, processed, or transmitted, including any associated physical security controls.

- **ICT Scope:** This includes all information and communication technology (ICT) platforms, systems, networks, and related infrastructure that support the processing, storage, and transmission of information within the organization.

4.1 Organizational Scope

Legal Entities

The ISMS applies to the following legal entities within the organization:

Name	Address	Category	Note
PayLink Digital Ltd.	London, Uk	Headquarter	Main Corporate HQ
PayLink EU GmbH	Berlin, Germany	Regional Office	EU operations hub
PayLink Asia Pte Ltd.	Singapore	Regional Office	APAC operations hub
PayLink Inc.	New York, USA	Regional Office	North America operations hub
PayLink India Pvt Ltd.	Bengaluru, India	Technology Hub	Primary technology and development center

Organizational Scope

The ISMS applies to the following organizational units within the organization:

- Payment & Merchant Services
- Compliance & Risk
- Engineering & Development
- Customer Success
- Finance Department
- HR Department

Processes

The ISMS applies to the following within the organization:

- Finance and Accounting
- Human Resources and Talent Management
- IT Service Management
- Organizational Planning and Strategy
- Business Continuity Planning
- Cloud and Network Security

- Security Operations and Incident Management
- Secure Software Development
- Risk and Change Management
- Asset Management
- Access and Identity Management
- Third Party / Supplier Management
- Compliance and Legal Management
- Data Protection & Privacy
- Training & Awareness

Services

The ISMS applied to the following services that are delivered by the organization:

Service Name	Description	Service Owner
Technical Support & Managed Security Services	-24/7 technical and operational support across PayLink platforms. -security monitoring and incident response -vulnerability management	Chief Information Security Officer (CISO)
Payment Gateway & Processing Services	Enables secure authorization, processing, clearing, and settlement of digital payment transactions for merchants and partners.	Chief Operations Officer (COO)
Open Banking & API Services	Provides secure, scalable open banking and payment APIs for integration with banks, fintechs, and third-party service providers, supporting regulated data sharing and payment initiation.	Chief Technology Officer (CTO)
Blockchain & cross-Border Settlement Services	Delivers blockchain-based ledger and settlement services to facilitate secure, transparent, and efficient cross-border financial transactions with immutable records.	Chief Technology Officer (CTO)
Fraud Detection & AML Services	Provides AI-driven transaction monitoring, fraud prevention, and AML analysis to detect suspicious activities.	Chief Compliance Officer (CCO)

PayLink Inc.	New York, USA	North-American regional office; regional operations, sales and partnerships
PayLink India Pvt Ltd.	Bengaluru, India	Technology and engineering hub

4.3 ICT Scope

The ICT scope defines the information and communications technology that is within the scope of the ISMS. The boundaries between components outside and inside of the scope are described as well.

The following ICT assets are included within the ISMS scope:

- Hardware: Servers, network devices, workstations, storage systems, backup systems, mobile devices
- Software: Temenos T24, Salesforce, Azure, AWS Sagemaker, GCP, Snowflake, Microsoft Power BI, GitLab CI/CD, Terraform, Kubernetes, ServiceNow
- Network Infrastructure: Corporate LAN/WAN, VPN gateways, cloud-hosted platforms
- Communication systems: Email servers, Collaboration tools, VoIP systems
- Cloud Services: AWS, Microsoft Azure, GCP, Salesforce
- Data Repositories: Cloud-based databases, file systems, and backup and archival storage
- Third-party systems: Managed cloud hosting, IT service management platform, external banking/payment API partners

The scope of the information and Communication Technology (ICT) within the ISMS is defined by the following boundaries and interfaces.

Physical Boundaries

Underlying physical infrastructure is hosted in cloud data centers managed by AWS, Microsoft Azure and Google Cloud Platform. The cloud providers maintain and manage the security controls which include surveillance, restricted facility access and environmental safeguards.

Logical Boundaries

The logical scope includes internal systems such as Salesforce for CRM, Temenos T24 for banking platform, AWS Sagemaker for fraud & AML analytics, DevOps tools (GitLab CI/CD, Terraform, Kubernetes), Snowflake, Microsoft BI, and ServiceNow. These internal systems communicate with each other and third-party systems through secure API- based integrations and are accessed via VPNS. Security measures include vulnerability scanning, firewalls and role-based access control.

Third-Party Boundaries

Third-party service providers include AWS, Azure, GCP and Salesforce, which host organizational data under contractual agreements such as SLAs and DPAs. These providers undergo regular assessments and monitoring to ensure compliance (such as GDPR, PCI-DSS, ISO/IEC 27001 and RBI) the region of data residency.

Exclusions from the ICT Scope

The following items are excluded from the ISMS ICT scope:

- Legacy IT systems scheduled for decommissioning within 12 months.
- Vendor internal infrastructure.
